# MMP70xx-127 Series

#### **MELF PIN Diodes**

Rev. V1

#### **Features**

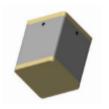

- · Ceramic Surface Mount Package
- Low R<sub>S</sub> <1 Ω (lower insertion loss & higher IIP3)
- Low Thermal Resistance <20°C/W for Higher Power
- · Hermetically Sealed
- RoHS\* Compliant

The MMP7000-127 MELF PIN diode series is manufactured using a proprietary diode process which optimizes the anode and cathode bonding area of the diode to the adjacent heat spreading metal posts within the ceramic package. This unique geometry provides lower electrical a nd thermal resistance within the surface mount package to provide higher average power performance to comparable surface mount diode packages.

With lower thermal resistance (<20 °C/W), RF C.W. incident power levels of 50 dBm and RF peak incident power levels of 60 dBm are very achievable in higher power UHF cold switching applications. The low series resistance (<1  $\Omega$ ), coupled with the longer minority carrier lifetime, (>8  $\mu$ s), provides better IIP3 distortion values >70 dBm, for SP2T TX-RX switches.

These devices are hermetically sealed and are constructed with materials to meet the stringent requirements for commercial and military applications. These devices are RoHS compliant.

CS127-1 & CS127-4

## **Applications**

These diodes are designed to be used in high average power switch and attenuator applications, operating from 1 MHz to 1 GHz at incident power levels of 100 W average power and 1 KW peak power. These devices are durable, reliable, and are capable of meeting all military, commercial, and industrial applications.

#### **Ordering Information**

Part Number	Package		
MMP70xx-127-1R	2000 piece reel		
MMP70xx-127-4R	500 piece reel		

<sup>\*</sup> Restrictions on Hazardous Substances, European Union Directive 2011/65/EU.

### **Absolute Maximum Ratings**

Parameter	Absolute Maximum		
Forward Current	1000 mA		
Forward Voltage	1.2 V, I <sub>F</sub> = 100 mA		
CW Power Dissipation	30 W, De-rate linearly from +25°C to +175°C @ -200 mW/°C		
Junction Temperature	+175°C		
Operating Temperature	-65°C to +125°C		
Storage Temperature	-65°C to +150°C		
Assembly Temperature	+260°C, t = 10 s		

## **Handling Procedures**

Please observe the following precautions to avoid damage:

#### **Static & Moisture Sensitivity**

These electronic devices are sensitive to electrostatic discharge (ESD) and can be damaged by static electricity. Proper ESD control techniques should be used when handling these Class 1A (HBM) devices. The moisture sensitivity level rating for this device is MSL1.

#### **Environmental Capabilities**

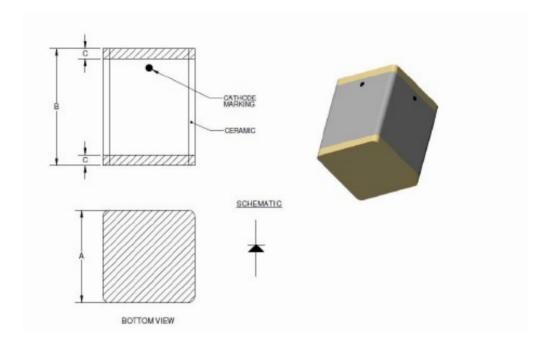

This diode is capable of meeting the environmental requirements of MIL-STD-750.
